EDUCATION

•Bachelor of Technology in Electronics and Communication Engineering

2021-25

Greater Noida Institute of Technology, Greater Noida

PERSONAL PROJECTS

•Structured Query Language Project(Pizza Sales Analysis)

Analyzed pizza sales data to identify trends, popular items, cumulative revenue, etc. providing insights for business optimization.

- Developed SQL queries to extract and analyze pizza sales data, creating a foundation for a sales performance dashboard.
- Utilized SQL to perform data cleaning, aggregation, and analysis of pizza sales, delivering actionable insights.
- Technology Used: SQL, Excel.

•Power BI Project(Sales Performance Dashboard)

Developed interactive Power BI dashboard to visualize and analyze sales trends across markets and regions.

- Created a comprehensive sales performance dashboard with Power BI, employing Data Modeling and DAX for data transformation and analysis of sales trends over time.
- Designed and implemented a Power BI dashboard by connecting and importing data from SQL Database Workspace leveraging DAX for key performance indicator (KPI) calculations.
- Technology Used: SQL, Power BI

•Machine Learning Project(Bangalore House Price Prediction)

Developed a machine learning model to predict house prices in Bangalore using Python (Pandas, NumPy, Scikit-learn).

- Implemented data cleaning, feature engineering, and model selection (Linear Regression, Decision Tree, Lasso, Ridge) with pipelining.
- Built a predictive model for Bangalore house prices, utilizing Python libraries for data preprocessing and machine learning algorithms. Evaluated model performance using metrics like accuracy and confusion matrices.
- Implemented a machine learning pipeline in Python to predict Bangalore house prices, including data cleaning, model training (Linear Regression, Decision Tree, Lasso, Ridge), and performance evaluation.
- Technology Used : Python, Machine Learning Algorithms.

EXPERIENCE

•Data Analyst Virtual Internship

Apr 2024 - May 2024

Cognifyz Technologies

Online

- Conducted data analysis using Excel and SQL, creating dashboards, pivot tables, and reports. Utilized various Excel functions (SUM, AVERAGE, UNIQUE, VLOOKUP, XLOOKUP) and SQL queries for data manipulation and analysis.
- Performed data extraction, cleaning, and analysis using Excel and SQL. Developed interactive dashboards and reports using Power BI, employing pivot tables and advanced Excel formulas.
- Gained practical experience in data analysis, utilizing Excel for dashboard creation and SQL for data querying.

•Data Science Virtual Internship

Apr 2024 - May 2024

Codsoft

Online

- Applied machine learning models (Linear Regression, Decision Tree, Lasso, Ridge) in Python (Pandas, NumPy, Scikit-learn) to predict outcomes. Performed data cleaning, feature engineering, and model evaluation using accuracy, precision, and recall.
- Gained experience in data preprocessing, model training, and evaluation using Python. Implemented machine learning pipelines and performed train-test splits for predictive modeling.
- Developed predictive models using Python, including data cleaning, feature engineering, and model selection. Evaluated model performance using confusion matrices and relevant metrics.

TECHNICAL SKILLS AND INTERESTS

Languages: Python

Libraries : Python Libraries

Software and Tools: VScode, Jupyter Notebook, PyCharm, Power BI Desktop, MySQL, Ms Excel

Databases: Relational Database(mysql)

Areas of Interest: Data Analysis, Data Science, Machine Learning.

Soft Skills: Problem Solving, Self-learning, Presentation, Adaptability
